

DBSAE – Federal Agency Registration

Overview

The Federal Agency Registration (FedReg) system facilitates the collection and information dissemination of Federal entities engaged in intra-governmental buying or selling. It provides the single authoritative source of Federal and Departmental entities engaged in intra-governmental transactions. FedReg allows each intra-governmental transaction to have information attached to it about each trading partner.

Trading partners are identified by a Business Partner Network (BPN) Number, which is the DUNS number for civilian agencies and DODACCs for DoD agencies. FedReg provides point of contact and other general information about the trading partner. FedReg also provides a central location for federal sellers to assist in source selection activities.

FedReg is an e-Gov initiative within the Integrated Acquisition Environment's (IAE) BPN. It is managed by the IAE.

Capabilities

FedReg is a government-wide system that collects and disseminates federal business partner data across the government. The system provides point of contact and contract information to aid in transaction reconciliations; provides a federal "Yellow Pages," where government buyers can go to find government sources for goods and services; and increases Federal sellers' visibility in the procurement arena and helps lower costs to the government by potentially increasing competition.

Benefits

FedReg is a government-wide system that collects and disseminates federal business partner data across the government. The system provides point of contact and contract information to aid in transaction reconciliations; provides a federal "Yellow Pages," where government buyers can go to find government sources for goods and services; and increases Federal sellers' visibility in the procurement arena and helps lower costs to the government by potentially increasing competition.

FedReg is a program within the Business Transformation Agency's Defense Business Systems Acquisition Executive (DBSAE) directorate. The DBSAE is responsible for driving the successful implementation of DoD systems and initiatives in support of the Department's business transformation goals. Its mission is to develop, coordinate, and integrate projects, programs, systems and initiatives providing DoD enterprise-wide business capabilities to the warfighter.
